## [100 Cpu Usage By Esets Daemon Ecsp For Mac](#)

---

SGI/IRIX is still using it, thus scans for it are probable attempts to locate IRIX targets.

A 'HELP' request to it returns Irix host's service listings tcpmux 1/udp # TCP Port Service Multiplexer One of original portmappers.. R 0/tcp # Reservedr 0/udp # Reservedtcpmux 1/tcp # TCP Port Service Multiplexer One of original portmappers.. SGI/IRIX is still using it, thus scans for it are probable attempts to locate IRIX targets.
